Using the application

1. Getting Started

In the application area of your phone, find and launch **MyLovesigns**. You will see the splash screen.

2. Main Menu

Items on the Main Menu screen are: **Daily Love Horoscope, What's Up Tonight, Singles Love, Couples Love, Love Match, Zodiac Love Wallpaper, Preferences** and **Help**.

3. Choose Item or Horoscope Type

Through the use of the Navigation key (usually a large 4-directional key), you can highlight individual menu items by pressing up or down on the key and execute the highlighted item by pressing the center of the Navigation key.

4. Select Astrological Sign

Change astrological signs by pressing right or left on the Navigation key and execute information for the displayed sign by pressing the center of the Navigation key. If you select the **Love Match** option you will be prompted to select a sign for yourself and one for your partner. Information for your chosen horoscope type is available for all 12 astrological signs – Capricorn, Aquarius, Pisces, Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio and Sagittarius.

5. Read Your MyLovesigns Horoscope

Once the sign or combination of signs is selected, the information for that horoscope type will be downloaded and displayed on the next screen. Horoscopes for other signs can be easily accessed by pressing right or left on the Navigation key.

6. Zodiac Wallpaper- (Available on select models only)

Through the use of the Navigation key, scroll through zodiac signs by pressing right or left on the key. Use up or down on the Navigation key to choose an additional sign if desired and execute the selection to create a custom wallpaper image by pressing the center of the Navigation key. Your custom wallpaper image will display on the next screen with an option for you to save or further customize with your own text.

7. Preferences

Items on the **Preferences** screen are: **Languages** and **Phone Info**. Additional items depend on phone model and may include: **Daily Messaging** and **Promotions**.

8. Help

By choosing the **Help** item you will be directed on how to use the navigation keys to work the application. Through the use of the Navigation key (usually a large 4-directional key), you can highlight individual menu items by pressing up or down on the key and execute the highlighted item by pressing the center of the Navigation key.
